Wolves look like big domestic dogs, but they are a little bit longer and taller. They have a relatively big head, short ears and a long, bushy tail. In different parts of the world their fur has different colours: from white or reddish to grey and black.

Their size and weight vary considerably depending on where they live. The biggest and heaviest wolves can be found in Latvia, Belarus, Alaska and Canada, where they are as long as 160 cm plus a tail of up to 52 cm. There they can be as heavy as 80 kg. In other regions of the world, like in East Poland, they are a lot smaller and lighter.
